Ohio Man Features Gas

Association's Meeting

By W. H. PECK.

KANSAS CITY, May 17.—The

outstanding feature of today's meet-

ing of the natural gas association

was a talk made by G. C. Maxwell

of the Ohio committee on public

utility information at Cleveland,

Ohio, who had for his subject

"Telling the Public the Story."

"A little over a year ago with

some misgivings at the outset, per-

haps, the Ohio committee on public

utility information arranged to sup-

plement its newspaper publicity

work by the establishment of a

speakers' bureau and the conduct

of an intensive speaking campaign

before city organizations of every

nature throughout the state, with

the power or regulation be exercised

through a state commission or a

regulatory body of officials. Your

regulation primarily rests with the

people themselves, and it is the duty

of the public to have knowledge of

the fundamental facts and condi-

tions underlying your industry. To

that extent will the public's regula-

tion of your business be just and

fair."

Mr. Maxwell met with much ap-

plause and evidently had the con-

vention with him. The object he

said of this publicity was usually to

keep the public informed in order

that they might invest in the securi-

ties of these utilities so that there

would be money enough available

to keep pace with the ever in-

creasing demand. Other speakers

of the day were H. C. Cooper of Pitt-

sburgh, Pa., who spoke on standardi-

zation in the natural gas industry;

Mr. B. Ray of Bartlesville, Okla.,

led the discussion in regard to

transmission of natural gas; and

F. Schaefer of Pittsburgh led the

discussion in regard to distribution

of natural gas.

The annual banquet which is to

be held in the Hamilton room of

the Baltimore hotel is going to be

the best in the history of the as-

sociation according to secretary

William B. Way who by the way, is

the last secretary so far as hold-

ing a meeting is concerned, and

has never been developed in the oil

or gas industry. A feature of the

banquet is to be a horse race with

young lady riders and with all the

paraphernalia of the race track in-

cluding the betting ring as a

feature.

Visitors to Gas Men's Con-

vention Having Delightful

Time With Much Enter-

tainment Provided—Fifty

Belated Tulsans

Arrive

By W. H. PECK.

The gas men devoted the major

part of Tuesday to visiting and

renewing old acquaintances. Many

were the returning delegates who

as old friends sometimes half for-

gotten met again and the talk was

all about things that happened years

ago and because old friends are

best friends, the day was passed

most pleasantly and was enjoyed by

arms are hardly long enough to feed

himself.

But after all, the Kansas City

convention now on its way down in

history as the convention having the

largest and best display, including

everything that goes to make up a

gas field or a distributing plant, this

too in addition to all the modern

equipment for burning gas, such as

stoves, both cooking and the modern

"radiant" kind, there are all being

paid to the artistic and the

improvements over last year is

very noticeable. It is said that the

entire business done and nearly

one attempted. One of the largest

manufacturers stated last night that

there would be nothing doing so far

as he was concerned in the way of

business until the convention was

over and time and to spend money

rather than to try to make it.

The crowd saw Indianapolis win a

baseball game from Kansas City and

the football game between the

Kansas City and the Harvard

team in this league and has a way

of bounding them off the center field

fence but has something lacking in

them, little business done and

an "inside baseball" which Indian-

apolis is not lacking. The latter

team remind one of the New York

Americans inasmuch as they are

well matched for size all the way

through and are comparatively

small as against the big fellows that

go to make up most of the Kansas

city team. There is no great dif-

ference between the playing of the

teams and the Tulsa aggregation

when matched with anyone of our

own good bunch of ballplayers. The

fact is Tulsa people at yesterday's

game were telling the Tulsa people

that it was a cinch that the Tulsa

team could trim Kansas City or Indian-

apolis either one, but maybe this is

a little strong.

Waite Phillips and Associates

Getting Big Well in

Untested Territory

Waite Phillips and associates, (J.

F. Darby, George Sneddon and Wal-

ter Campbell,) test in the southwest

of the southeast of the northeast

of 22-16-9, is flowing 35 barrels per

hour and making 10,000,000 feet of

gas at 10 feet in the pay sand, which

was topped at 2,974 feet.

This nice producer tests undevel-

oped territory about one mile square

in area, and is located between the

good wells of the Atlantic Petroleum

corporation, the Texas company and

the Continental Petroleum corpora-

tion in the southwest of 22-16-9, and

uses up the trend with the Prairie

Oil & Gas Co. 900-barrel producer

in the center of the north line of

the northeast of 22-16-9.

Indianapolis Getting Well

In Taneha Sand

The Indianapolis Refining company

test in the southeast of the southeast

of 16-11-11, Slick district, is four

feet in the oil pay and is making 60

barrels per hour. Top of the Taneha

sand was found at 2,975 feet, and

first oil at 2,104.

Carter Drilling in Important

Test Today

The Carter Oil company is on top

Bartlesville Sand Dry

The McMan Oil company is drill-

ing through the Bartlesville sand in

its No. 1, school land, in the south-

east of the northwest of 26-30-8,

with an oil and gas show at a

depth of 2,600 feet. This well is

in the Mannford district.

At Burbank

The Kawank Oil & Gas Co. shot

No. 4 in the Burbank district on

Tuesday, in the southwest of the

"radiant" kind, there are all being

paid to the artistic and the

improvements over last year is

very noticeable. It is said that the

entire business done and nearly

one attempted. One of the largest

manufacturers stated last night that

there would be nothing doing so far

as he was concerned in the way of

business until the convention was

over and time and to spend money

rather than to try to make it.

The crowd saw Indianapolis win a

baseball game from Kansas City and

the football game between the

Kansas City and the Harvard

team in this league and has a way

apolis either one, but maybe this is

a little strong.

McDougal Well Nice

Producer

The McDougal Oil company well

in 1-23-11, Greenwood county, Kan.

is now on the pump and is produc-

ing 195-barrels per day. The Mid-

land Refining company is connecting

its main line and is now taking

the oil to the William McDougal

at Madison, Kan.

Ticker Dope

NEW YORK.—The annual report

of the Standard Oil company of New

Jersey shows that the earnings per

share on the common stock (par

value \$15) last year was \$5.97, or 7

cents more than its dividend require-

ment. In 1920 the company earned

\$38.81 a share. Accumulated surplus

amounts to \$54,500,000, or about

six times the amount of the common

stock outstanding.

NEW YORK, May 17.—Middle

States reports discovery at 1,900

feet of a deep sand and on the

gladious Burnett lease, the Electric

field, Texas, the well making 1,000

barrels. This lease has been very

productive, the company heretofore

getting oil from three sands at 600

feet, 1,400 and 1,500 feet, respec-

tively. It holds a substantial amount

of acreage in this field.

Humphreys-Pure Oil Pipe Line

company is now moving Mexican

crude to the gulf. This line, which

was started in January, was com-

pleted practically on schedule time.

The line is 21-inch pipe and is

220 miles long. It has a daily ca-
